

# BOARDROOM RECORDING

**Boardroom recording allows participants to record all conversations taking place during any meeting, and the recorders are able to clearly capture and repeat the conversation even when members are talking with their heads down, when they stand away from the recorder, or if their backs are facing the recording system.**

## **Advantages of boardroom recording:**

- **Records high quality conversations.**
- **Absolutely no more unheard comments of conversations because of a member's accent, poor pronunciation or lowered speech.**
- **No more missing specific comments because of meeting interruptions such as taking and eating of snacks.**
- **No more taking minutes in meetings or arranging an employee to take those minutes.**
- **Meeting recording benefits any company in the industry.**
- **Boardroom recording will enable you to store reliable and clear conversations in the comfort of your own boardroom or meeting room.**
- **Overall, recording meetings will assist with increased collaboration and productivity, greater flexibility, faster decisions, lower costs, and improved customer and employee relationships.**
