

CLOUD ARCHIVING FOR AMETHYST²

If you are already an AMETHYST client, you can benefit from our Cloud archiving option. Cloud archiving includes cost effective long term storage with seamless access to offsite back-ups through your Supervisor interface. No additional software is required.

Benefits of Cloud Archiving:

- **Peace of mind** – Backups are managed by Datatex.
- **Cost-effective** - No storing and maintaining of substantial amounts of call recording data in-house.
- **Offsite storage** – Backups are automatically stored offsite.
- **No backup disc space required** - No need to buy or upgrade hardware to store call recordings.
- **Minimum 5 years storage** – With the Option to extend.
- **Dual archiving** – Option to keep standard AMETHYST archiving in place as well as archiving to the cloud.
- **No special hardware or software** – All you need is AMETHYST.
- **Easy activation** – via your Supervisor interface.
- **Straightforward, affordable billing** - Pay according to your storage used.
- **Seamless access** – Access to archived recordings via the Supervisor interface.
- **Archiving Dashboard** – The dashboard shows all necessary system related information e.g. disc space and if the archives were successful.
- **Managed by Datatex** – We do the archiving for you.
- **Daily archiving** – to the cloud.

Requirements:

 **Amethyst²**TM
Call Recording Solution
& at least one years' live recordings on
AMETHYST²
